News Release 2014-6

INZINC ANNOUNCES INCREASED PRIVATE PLACEMENT

InZinc Mining Ltd. (IZN-TSX Venture) (the “Company”) wishes to announce that it has agreed to increase the non-brokered private placement announced on August 7, 2014. The placement now consists of 3.3334 million units at a price of 18 cents per unit for proceeds of \$600,012. Each unit consists of one common share and one-half of one common share purchase warrant. Each full warrant will entitle its holder to subscribe for one share at 30 cents per share for a period of 24 months from completion of the financing. No commission is payable and proceeds from the placement will be used for general corporate purposes.

Closing of the financing is imminent and is subject to all regulatory approvals, including the approval of the TSX Venture Exchange. The securities issued in connection with the financing will bear a four-month restriction on resale from the completion date.

About InZinc

InZinc Mining Ltd. is focussed on advancing its 100% owned West Desert zinc-copper-iron project in western Utah. An independent Preliminary Economic Assessment (PEA) was announced on April 1, 2014 and concludes that conventional mining and processing of the West Desert resources would provide strong potential cash-flow and a corresponding high rate of return (see NR14-02). From clean, high-quality concentrates, West Desert has the potential to produce 1.6 billion pounds of payable zinc and 146 million pounds of payable copper at low cost over a mine life of approximately 15 years. Over the same period, approximately 15 million tonnes of high quality iron (magnetite) concentrates suitable for domestic or off-shore markets would be produced as a potential high-value co-product, also at low cost.

West Desert benefits from all-weather road access, on-site grid power and proximity to natural gas. It is located 90 km from multiple transcontinental rail networks servicing multiple western US ports and accessing all major North American markets. Large and potentially expandable resources are an additional advantage for the project.

Chris Staargaard, P.Geo., a Qualified Person as defined in NI43-101, has approved the technical content of this news release.
